**METHOD FOR DETERMINING ADDITIONAL FUEL

FOR DISPLAYING ADDITIONAL FUEL CONSUMPTION**

FINAL OFFICE ACTION

This action is in response to the Applicant's amendment received on March 12, 2008.

DECLARATION

In view of the Applicant's newly submitted declaration, the objection thereto as set forth in the previous office action (Dec. 12, 2007) has been overcome.

SPECIFICATION

In view of the Applicant's amended specification, the objection to the specification as set forth in said previous office action has been overcome.

CLAIMS

The Examiner points out that claims 2-7 have been amended by the Applicant even though the actual amended subject matter of the claims has not been indicated.

35 U.S.C. § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3, 5, and 7 remain rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which the Applicant regards as the invention for the following reasons:

Claim 3, the terms “it” (line 2) and “its” (line 4) are indefinite.

Claim 5, the phrase “the characteristic fields” lacks antecedent basis and is thus indefinite as to what is being referred to.

Claim 7, the phrase “the generator model” lacks antecedent basis and is thus indefinite.

35 U.S.C. § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by the Applicant's admitted prior art of Barske (5,336,932).

With respect to claim 1, Barske suggests a method for determining the fuel consumption of an electrical consumer in a motor vehicle with an internal combustion engine, supplied by a generator which is driven by the internal combustion engine, comprising

determining at least one current value of the generator mechanical power input upon energization of the electrical consumer (col. 5, lines 1-21 and col. 6, lines 37-44).

With respect to claims 2 and 3, Barske sets forth that the monitoring of power discharging from the battery, and thus inputting into the generator, is continuous and as such "at different times" and when an "electrical consumer is connected" as claimed.

With respect to claim 5, Barske suggests determining electrical power input by means of characteristic field values as claimed (Fig. 1).

Allowable Subject Matter

Claims 4, 6, and 7 would be allowable if rewritten to overcome any rejection under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims because the prior art fails to teach or suggest the claimed subject matter of each claim.

Response To Arguments

The Applicant's arguments have been considered but have not been found to be persuasive.

Barske sets forth that the connection of the generator has resulted in an increase in the fuel consumption because of the power demand increase. Thus, as the demand on the generator increases, by any electrical consumer that the generator supplies power to, the amount of fuel consumption increases. In addition, the generator of Barske itself can be deemed as the electrical consumer as claimed because nothing in the claim distinguishes the electrical consumer from the generator.

CONCLUSION

THIS ACTION IS MADE FINAL. The Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
